Note 1: With the exception of Year of the Snake, above, all albums listed are certified . Note 2: In the UK, Kelly was nominated for the "Best Male Pop Artist" at the 1992 Brit Awards. List of songs recorded by American singer R. Kelly .Q: undefined method `-' when using methods in a new class I am using the Rails 4.2.6 version. I have this methods inside my models/users.rb file. def self.areas_of_interest(options) Area.all.order("name asc") end I have a new class called Courses. I am using "courses" method inside my view in a loop I have also created a Courses controller class CoursesController I have used the title attribute in my views and the method works fine for title. But not working with course. A: In your Course model you defined an areas_of_interest method. This method is defined in the User model (this is where I assumed you defined this method). You are getting an error because when you call courses.each you are asking ruby to run courses.areas_of_interest but ruby doesn't know what areas_of_interest is. To fix this you need to specify the area_of_interest options. Something like this: If you are not using Rails4 you need to call the method on the course model. Something like this: Q: How to implement an activity with list in the 2d92ce491b
