Q: Show Checked components of Arraylist in JTable I have a JTable that displays values from an Arraylist. When a user checks a checkbox from a row in the table, I would like to check the same row in the arraylist. As you can tell from my code below, i'm not doing this correctly as nothing is saved when a row is unchecked and I don't know why. All of my arraylist values are correctly displaying in the table, but when I check
