In order to install the software, you should have the privilege to run the setup file. In case you cannot operate the setup file, then you will need to ask for the license. A faraway planet is being monitored by a super-computer. Suddenly, a huge explosion occurs on the planet. A missile is released from the meteor with the intention of destroying the planet. The Supercomputer has no

knowledge of this and its fighting a losing battle. It is revealed to the Supercomputer in an emergency message "the missile is going to hit us unless we launch a counter-missile!" Suddenly, the Supercomputer finds a new energy source and collects it in the planet. A strange creature suddenly emerges from the planet carrying a mysterious device. The creature is actually a robot for the Supercomputer to use as a weapon. The creature takes off a special helmet and shows the Supercomputer a video of a human being from a different time, which makes the supercomputer think "this planet has life!" The supercomputer then

realizes that humans are an evolutionary lifeform and will eventually become as powerful as it is and will be able to destroy the planet if something is not done to stop it. It then decides to study humans at length and decides to evolve them and will do so by dropping a meteorite on Earth to start the process. The supercomputer then seeks out all humans in order to evolve them. It then studies human evolution for a great deal of time and then slowly forms a time machine. The time machine is then used to return humans to their respective eras, as required, and when the supercomputer eventually has a time machine, it actually returns themselves to their time. The

robot creature then takes off with the helmet to drop the meteorite on Earth. The human in the video calls to the supercomputer and explains everything as it happened, and the supercomputer decides to put an end to the process. The human asks the robot creature to drop the meteorite, which has now been given a name "Alien," as it is from an alien planet, as the human has now realized that it is their planet! The supercomputer then checks and finds that the lifeforms on the planet are

Maxthon is one of the most popular browsers in the web. It's easy to use and really offers a lot of options. That's why Maxthon decided to make our life easier. We decided to create a Maxthon plugin that can refresh your browser, restart Maxthon with a few different settings, or even close all the open tabs. Maxthon Redirects Short Cut : Startup Preferences Settings – When you launch Maxthon, you'll be asked to set some options, like the number of last open

tabs. During the startup, Maxthon will open a window which will give you the option to either restore the tabs you set or to show all tabs that were previously opened, as well as the ones from the current session. Maxthon Restart Short Cut : If you're having trouble or just want to close all the open tabs, Maxthon has you covered. You don't even have to click the browser's menu bar to close all open tabs. A couple of mouse clicks will do the trick. The plugins we've created are programmed to close all the tabs, and to start Maxthon with a new startup option. Maxthon Last Visited Short Cut : The last option you should explore is to have Maxthon redirect to your last

visited website. This means that you won't have to open new tabs for every website, but just to close them and get redirected to the last visited website. Our plugins are easy to install and use, and can really make a difference on your browsing experience. We've created Maxthon plugins to restart your browser, redirect you to all open tabs, and to close all open tabs in a single click. 0
