A publication by Rowan Dodwell and Giles Helie, entitled Autodesk-led Application Development, shows how these tools can be used for building applications such as parts list manufacturing, CAD conversion and file archiving. 2D 2D 2D Zooming was available on AutoCAD 10 and later and is now available in AutoCAD LT 2012 or later. 2D animation was introduced in AutoCAD 2008. It allows an animation to be created in a drawing, which can be later played back or saved as a project, thus being able to create a movie. In AutoCAD LT, this functionality is available as of AutoCAD LT 2011. AutoCAD 2D has been replaced by AutoCAD LT. 3D 3D AutoCAD introduced the Drawing Environment (which includes the Drawing workspace). This was later replaced by the Drawing View. The drawing interface (the interactive drawing surface) and the application interface (the windows and dialogs which form the overall look and feel of AutoCAD) were both separated for the first time. The programmable drawing environment allows drawing functions to be added using the Windows API. The CAD scripting language AutoLISP was designed to allow programmers to write scripts which can be run inside AutoCAD. In the initial release, AutoCAD ran the scripts through a macro recorder, which created executable programs. The first AutoCAD release also supported object-oriented programming (AutoCAD 2017). The Unified Modeling Language (UML) is supported by AutoCAD 2009. The SubSet CAD project was originally part of the Subset-based Modeling Environment (SUBME) project. SubSet CAD is now a separate project, but most of its functionality is now included in AutoCAD Architecture. AutoCAD 2011 includes support for most Autodesk software components and Application Programming Interfaces (APIs). AutoCAD Architecture is an Autodesk project which was originally designed to provide basic object-oriented modeling capabilities to the AutoCAD Architect application and to complement the AutoCAD Add-On Architecture. It has become one of the most important CAD applications, and is often used by individuals and firms in the design of residential and commercial projects. It was replaced by the AutoCAD Architecture Plus Edition in 2011. AutoCAD Architecture, which is now part of the AutoCAD Add-On
