RSS and E-mail Notifier Notifier keeps you in the loop with your latest RSS and E-mail

Notifications. It allows you to receive Notifications from multiple RSS sources like Enigma Software, Google Reader, Facebook and more and you can set your own custom RSS URLs, different for different Notifications categories. dShell Ease your work by making sharing files easier than ever before. dShell is the quickest and the easiest way to share and collaborate with your team. You can create your own online network to collaborate on any type of file, including videos, images, PDFs, Word documents and all types of binary data. GeoSnipping Keep your desktop locations visible at all times for your team and to the people you share your desktop with. GeoSnip apps allow you to perform a convenient search and share desktop locations with both images and location files. Showfree HD Video

Converter Showfree HD Video Converter will convert any videos to the latest HD (High Definition) formats, so you can watch them on any HD-compatible display device. Meanwhile, Showfree HD Video Converter provides a list of the most widely compatible HD-compatible devices. Showfree HD Video Converter now supports the latest 1080p HD format. Split QT Player SplitQT Player is a video player that can play virtually all the videos (QT/AVI/AVS/WMV/H263/MKV) files out there. Also it has all the great features you may expect from a media player. It supports multi-screen and allows you to view multiple different videos in full screen at the same time. Notepad++ Notepad++ is an open-source text editor, that supports most

32bit Internet Fax is a freeware software based on the windows platform. WinPrint is a free software utility for managing network printers such as Windows, Macintosh, and UNIX print servers. With it, you can print, preview, and delete your documents. It can be used also for virtual networks. You can also view, create, and delete printers, printers policies, printer pools and server properties. Revision Control Editors Textpad allows you to use tabs to divide up your source code into sections, for example, user interface widgets, database queries, file modifications, etc. Tabs help you structure your source code in a way that makes the code easier to read and keeps the files neat and clean. Built-in syntax highlighting and

bracket matching provide support for Perl, PHP, Java, C++, HTML, SQL, Oracle, XML and other languages. TextPad also has built-in code templates for most of these languages and the ability to import and export from HTML or external file formats. TextPad supports syntax highlighting not only for source code, but also for other text files and can be used to view and edit HTML, XML, PlainText, PDF and RTF files. You can link to source code, built-in templates, and external files and let TextPad organize and highlight them for you. FTPzilla is a Free FTP client. FTPzilla is 100% supported by PHP, Perl and ajax, so that you can write FTP applications on the fly. The development process is done in a minutes, no time consuming compilers. The program is a working FTP server at your own site,

complete with FTP login and FTP commands. Revision Control Editors
Eclipse is a free Java-based development platform. It contains an integrated development environment (IDE) for writing and deploying Java programs. Other tools in Eclipse include an XML editor, debugger, and a visual editor for program structure. Eclipse is not a general-purpose IDE, but instead targets a certain type of development. AJAX-Javascript editor/compiler/IDE (you put in HTML, PHP, JSP, ASP, ASP.NET, and you get the result in source format!). On Save the editor stores the results so it can be used to write script online to run on the server. It is fast, robust and supports C#, ASP, ASP.NET, PHP, JSP, VB, HTML, JavaScript,
